

THE GOOD, THE BAD, AND THE SERVERLESS

10 Pros and Cons That'll Make You Want to Smash Your Print Servers Today.

PROS OF SERVERLESS PRINTING

#1 Smash the Single Point of Failure

Let's face it. You never liked your print servers anyway. Reduce infrastructure and get rid of spooler crashes for good.

#2 Take Charge From a Single Console

Consolidate your print environment and address every print management task from a single console—no matter where you are.

#3 No More PrintNightmare

Protect your printed documents from end-to-end and eliminate print spooler vulnerabilities once and for all.

#4 Cut Out Scripts and GPO Deployments Forever

Eliminate the most unpredictable part of the job. Deliver authorized printers automatically to your end users by clicking a few boxes.

#5 Print on the Go

Hybrid users get access to network printers automatically when traveling between company offices—and can print securely from anywhere in the world.

73%

of organizations are expecting to increase cloud-based print management usage by 2025.

Fun Fact: ZERO PrinterLogic customers were affected by PrintNightmare.

TOP PLACES TO PRINT:

The beach

Your favorite brewery

Comic-Con

A cabin in the woods

Your Dungeon Master's basement

CONS OF SERVERLESS PRINTING

#1 Overwhelming Amounts of Free Time

Now that managing your printers and users takes just a few clicks, you can finally revisit those old projects you never got around to.

Or worse, managing all those cables in your workspace.

#2 Finding a Place to Put Your Old User Manuals

Sorry to take away the joy of reading long, unexciting instruction manuals. Try putting them next to those old encyclopedias you never use.

#3 You're Spoiled for Choice

You've reached the pinnacle of simplified print management. It'll be a struggle deciding which exciting print management features you want that'll change your life next.

#4 Excess IT Budget

You're under pressure because you have extra budget sitting around and have to spend it all before the end of the year. Could life get any worse?

#5 End Users Won't Call You...Ever

Users can install printers themselves without your help and your office is dead quiet. You might actually wish the phone rang sometimes...

71%

of PrinterLogic customers reduced time spent on print management by more than half.
